SPECIALISING IN SUSTAINABLE
AIRPORTS & PORTS

As a global leader in sustainable pavement solutions, HIWAY brings nearly four decades of scientific research and technical expertise to every airport and port project.

With airports and ports existing as social and economic hubs, connecting towns, cities and countries, every infrastructure project is highly time-sensitive. This requires strategic programming to ensure minimal disruption to our communities, particularly those in regional and remote areas who rely on these vital links for their daily lives and well-being.

Our innovation in pavement design project testing and construction methodology allows our team of experts to complete projects cost-effectively and efficiently. Specialising in regional and remote locations and complex climate conditions, we approach every project with compliance, sustainability and the wider community in mind.

Our communities deserve it.
Our environment depends on it.

HIWAY. Where precision meets efficiency

At HIWAY, we're committed to delivering innovative and sustainable time-critical infrastructure solutions for clients across the airports and ports industry. Our expertise lies in utilising in-situ materials which not only minimises the reliance on quarried aggregates, it mitigates other potential risks associated with vehicle movements and FOD. HIWAY has extensive project and risk management experience to ensure seamless operations with minimal disruption to supply chain and logistical flow.

Minimise schedule disruptions

Optimise time and cost efficiencies

Reduce reliance on new virgin materials

Reduce carbon emissions

From the beginning, HIWAY's approach has been a collaborative one. As a team, we have worked in consultation with our clients, where decades of experience, research and data-driven evidence deliver the best possible outcomes.

As a leader in sustainable pavement solutions across Australasia, and the second largest globally, it is really HIWAY's enviable track record and industry reputation that best demonstrates our commitment to innovation and performance within the airports and ports sector.

Keeping our communities connected

Our team of experts understand the unique complexities of every airport and/or port project. Poor pre-existing conditions and short delivery timeframes can require considerable expertise to ensure projects are completed to the highest quality, to exacting requirements and delivered under critical timelines.

Combining extensive experience with market leading research and technology, we offer innovative solutions for logistical challenges, harsh and unpredictable weather conditions, and working with busy departure and arrival rosters.

HIWAY's in-house design and contracting teams are industry experts, dedicated to delivering resilient and efficient solutions, suitable for even the most complex and damaged pavements and runways. Specialising in heavy-duty pavement design and construction, our focus on the optimal utilisation of existing in-situ materials supports delivery of more cost effective, low carbon and program efficient solutions while developing superior performing and long lasting critical infrastructure.

Delivering under pressure

From granular reshaping to foamed bitumen recycling, sub-grade improvement and sealing through to post-construction testing, HIWAY has delivered high-quality, sustainable pavement solutions for some of Australia and New Zealand's most complicated airport and port sites.

In addition to our technical expertise, employing our high productivity, purpose-built, state of the art plant, allows HIWAY to prioritise seamless project execution with minimal disruption.

Our focus on sustainability and efficiency means our solutions exceed industry standards, delivering lasting benefits that enhance the performance and safety of airport facilities. Whether upgrading existing runways or developing new ones, HIWAY remains dedicated to providing innovative, high-quality solutions that support the sector's evolving needs.

With nearly four decades of experience, HIWAY ensures efficient and effective paving and runway solutions while substantially reducing emissions, disruption and cost.

HIWAY

By working together, we can develop a more sustainable and robust road network for all.
